

URQUHART'S SINCE 1991

2026 Farm Map and Tree Cutting Guide

Tree Pricing:

$99 - Trees 7 feet and shorter
$13.50 per foot - Trees 8 feet and taller
Pre-cut trees priced as marked

Full Service Hours:

November 21st & 22nd	10am - 5pm
November 27th - 29th	10am - 5pm
December 4th - 6th	10am - 5pm
December 11th - 13th	10am - 5pm

Self-Serve Hours:

Starting November 23rd
Mon - Thurs 10am - 5pm
Starting December 14th
Open daily 10am - 5pm

The Basics:

Please see the drive-through greeter as you enter; they will give you advice on what direction to go to find your perfect tree. If shopping on a self-serve day, instructions will be marked near the entrance or parking area. We have pull carts and saws available to make things easier. Our staff will measure and price your tree when you return to the baling station. No vehicles are permitted in fields. Pets must be kept on leashes and cleaned up after.

10011 Jackson Rd
Satellite Field

We are Currently Rebuilding our Inventory. Our selection of u-cut trees is below desired levels. We have many young trees on the way, but it takes time for them to grow tall enough to sell. If you don't find a tree in the field this year, consider purchasing a pre-cut and revisiting us next year.

To help protect our future inventory, we are requiring all u-cut trees to be at least 6 feet tall.

Please Watch for Small Trees! We have many small trees planted, and they can be hard to see in the grass. We would appreciate you keeping an eye out for our small trees and trying to avoid any damage to them. Thank you!

Consider "Topping" a Tree. Many of our trees don't grow perfectly the whole way up, and can leave an ugly bottom. If you come upon such a tree, we'll allow you to cut and pay for only the pretty top portion of the tree. Look for more info on the next page.

Canaan Fir
Korean Fir
White Pine
Serbian Spruce
Blue Spruce
White Spruce

Small Trees (less than 9 feet)
Medium Trees (9-15 feet)
Large Trees (15+ feet)

The Basics / Cutting Down a Tree:

1) **Borrow a saw and a cart if you like**. Feel free to skip the cart line if your group can carry your tree.
2) **Choose a tree.** All trees 6 feet tall and taller are fair game. Borrow a measure stick if you like.
3) **Select a tree and cut it down**. Our map is imperfect, so talking to a greeter about your specific wishes is your best bet. Keeping an open mind on variety while you search can also be very helpful.
4) **It's all about the trunk**. Remember that most tree stands require a foot or so of branch-free trunk.
5) **Consider "topping" a tree**. In some fields, we allow you to cut an older tree with an ugly bottom and a pretty top. This eliminates waste and preserves young trees for future years. We trust you to make a good decision for us (for example, please do not cut a 14-foot tree with 10 feet of pretty top if you only want a 7-foot tree). Read more about the logistics of topping a tree in the FAQs below.
6) **What if I want to cut my own small tree**? You can take less than 6 feet of tree home, but you need to start with a tree that is at least 6 feet tall, and to bring 6 feet or more of tree to the baling station. We can shorten your tree for you if desired. We will have smaller pre-cut trees for customers who want a tree shorter than 6 feet.
7) **Measure, shake and bale your tree**. During full service we measure, shake and bale your tree for you. During self-service, shaking is not possible, but you are welcome to bale your tree yourself (assuming it is not too big).
8) **Pay for your tree during full service.** We accept cash, checks and all cards in all locations. The price of U-cut trees is $99 for trees 7 feet and shorter, and $13.50 per foot for trees 8 feet and taller. Some pre-cut trees have a price tag that may be more expensive or less expensive than a U-cut tree of the same size.
9) **Pay for your tree during self-service. O**n a self-serve day, call us at (734) 433-8733 **BEFORE** you leave the property. If we are here, we expect to be paid during your visit. If we don't answer the phone, we expect a voicemail with your name, phone number and vehicle color, make, model, and plate number before you leave the property. Getting a phone call before you pull through the gate is how we know that you plan to pay for your tree.

What is New This Year:

1) **Inventory.** Our inventory of growing trees is a bit lean this year, and the trees that we have are spread out all over the place. We are working hard to rebuild our inventory, but it will take time. We have an "inventory FAQ" page online and in the barn if you want to learn what happened and what we are doing to fix it.
2) **Six Foot Minimum**. This year we are not allowing customers to cut trees shorter than 6 feet. Item number 6 in the first section explains how to take home a U-cut tree that is shorter than six feet tall.
3) **Pre-cut trees.** Pre-cut trees are at the main farm only. Noble fir and premium fraser fir are east of the barns by the greeters. Regular and budget priced pre-cut trees are located west of the barns.
4) **Tractor rides.** The tractor destination depends on the day, inventory, and weather. There is no place that the tractor goes that cannot also be accessed on foot. If you decide to ride the tractor, look for the green steps between our main barn and the pre-cut trees located just to west of the main barn.
5) **What's the deal with those "lollipop" trees?** We trim the lower branches of some of our older trees with ugly bottoms to highlight the pretty trees hidden in the tops. Please cut lollipop trees a foot below the first set of branches to ensure there is sufficient trunk for your tree stand (see "topping a tree" below for more details).
6) **Satellite Field Inventory.** The satellite field remains a good place for large trees, but there are not many small trees left. We do have some nice small concolor fir in the satellite field, and topping is allowed in that field.
7) **Main Farm Open for Self Service.** This year the entire farm will be open on all self-service days. On our busiest self-serve days, the gift shop will be open and all customers will pay in the barn.

Rules and FAQ

1) **No driving in fields**, unless allowed by the greeters (sometimes allowed in certain areas on certain days for certain trees, and an employee escort is often required). Please don't assume you can drive somewhere just because we allowed you to do so on a previous occasion.
2) **Pets are welcome** as long as they stay on a leash and you clean up after them.
3) **Where do I cut my tree?** Trees should generally be cut within a few inches of the ground so people are not injured, and equipment is not damaged by hidden stumps. Read the next FAQ if you are topping a tree.
4) **How do I "top" a tree?** We strongly suggest cutting all trees near the ground first, so that the top of the tree is not the first thing to hit the ground (the top often breaks off when that happens). Once the tree falls you can remove the part you don't want and leave it in the field. If you decide not to cut your tree at ground level, please cut it high enough so that the remaining portion is clearly visible above the grass for safety.
5) **Be very careful with tree carts and saws.** Saws are very sharp – if kids hold them, they need constant and direct supervision. Cart handles are heavy, so don't let them fall on kids that may be sitting on a cart.
6) **Please be careful not to hurt younger trees.** It takes many years for a young tree to become a Christmas tree, and they are especially fragile when they are small. Please be careful where you walk through our fields and supervise your children carefully.
